

# Self-Leveling Horizontal/Vertical Cross-Line Laser

Model SK104Z

Horizontal/Vertical Reference Lines Required in Leveling and Aligning Applications

## VERSATILITY

Horizontal/vertical reference lines required in leveling and aligning applications

## CAPACITY

Extended laser line fan length spans well past 90° position

## DURABILITY

Integrated pendulum lock offers added protection of laser diode during transport and storage

## FEATURES

- Robust and handy design
- Water and dust proof (Protection class IP54)
- Fast self-leveling time; stability is achieved in 3 seconds for increased productivity
- Self-leveling is correctable up to 4° of slope allowing operation on uneven surfaces
- Bright 635 nm class II laser for best-in-class visibility in moderate ambient light environment
- 2 crossing 180° laser lines provides precise work
- Integrated pendulum lock enables slope incline applications for increased versatility
- Pulse mode conserves and extends battery life for increased operation time in low light environments

## SPECIFICATIONS

<b>Measuring Range</b>	Up to : 15m with detector Up to : 60m
<b>Leveling accuracy</b>	±3mm / 10m
<b>Self-leveling range</b>	4±1°
<b>Laser fan angle</b>	Horizontal : 180° Vertical : 180°
<b>Number of laser lines</b>	2
<b>Laser type</b>	Laser class 2 : 635nm
<b>Tripod thread</b>	1/4"
<b>Protection class</b>	IP54
<b>Net weight</b>	0.47kg

## STANDARD EQUIPMENT

- Magnetic bracket
- Target card
- (3) AA batteries
- Carrying pouch

All specifications subject to change without prior notice. All models and accessories subject to stock on hand.
